

Single Head Quantitative Packaging Scale DCS-A

Feature

It has the advantage of high calculating precision, stable functioning, digital demonstration and easy operation.

The auto-adapted software has the function of controlling the parameter setup, the self-correcting of the fall height, deviation alarm and fault self-diagnostics etc.

Wide quantitative extent, high precision and a platform that can be raised and lowered makes it have more functions and efficiency higher.

Adopt the imported sensor and pneumatic implementation mechanism which makes the work reliable, the maintenance easy and no pollution.

The cabinet adopt advanced plastic-sprayed craft and component contacted with raw material all adopt imported stainless steel that can be used for a long period, for its high sanitation standard and anticorrosion.

Specification:

Model	DCS-5	DCS-15	DCS-25
Packaging Capacity	1-5kg	2-150kg	5-50kg
Packaging error	0.2%F.S	0.2%F.S	0.1%F.S
Division	2g	5g	10g
Accuracy Grade	x(0.2) x(0.1)		
Packaging Speed	5-25kg >=600bags/H 50kg>=400bags/H		
Power Supply	AC220V 50HZ		
Air Consumption	0.4-0.8MPa		
Production Size	2560*6500*715(mm)		
Standard	pneumatics
