

Body Height Weight Fat Composition Scale HS-19BF

It can be optional face recognition function. They share the same strong steel bottom part and aluminum alloy shell, that ensures the stability of the machine and an accurate weight up to 500Kg, with 100 g accuracy. They have different designs and specifications to meet the needs of our customers.

It can make healthcare testing in one-stop: body fat ,body water, height, weight , BMI, let say ,full body testing, with on-site result printed from thermal printer ,we care what you care on health managing .

Highlight:

Automatically measures weight, height, BMI, Fat, body composition analysis

Intelligent Face Recognition (optional)

Thermal printing, automatic paper cutting function

Automatic voice broadcast of measurement results

Voice (Audio) Output

Large screen digital 19.0 inch LCD display

Feature:

Height range: 20-210cm, Weight range: 5-500kg

Measurement items: Height, Weight, BMI, Body Fat, Print Function, Coin operated (optional) TMB

Applications:

Ideal choice for hospitals and clinics, Schools, Physical examination centers, Health clubs, Gymnasiums

Technical Data:

Model	HS-19BF
Height and weight	Height :50cm-210cm; Weight :5- 500kg;
Measurement Accurate	Height :±0.5cm; Weight :±0.1kg
Fat and Basal metabolism	Fat:5.0- 50%, Basal metabolism:385kcal- 5000kcal;
Print	Thermal automatic printing and paper-cutting
Coin operated(Optional)	Intelligent multi-currency recognition
Data transmission	RS232,WIFI, Bluetooth (optional) RJ45 (optional)
Gross weight	45.5KG
Overall dimensions	580*575*2320mm
Packing Size	180*49*22cm (20kgs), 68*49*40cm(25kgs), 0.33CBM
Power Supply Voltage	AC100V-240V,50Hz-60Hz
