

## Multi-level Sorting Dynamic Check Weigher MCS-L

### Full Range of Checkweighers

Dynamic checkweigher series products include medium and low-speed checkweighers suitable for vertical packaging machines, high-speed checkweighers suitable for pharmaceutical and food quality inspection, and large-scale checkweighers suitable for packaging and logistics industries. Heavy technical performance is very good. global series of products are committed to assisting the needs of online production weighing, quality inspection, etc. in hardware, food, pharmaceutical, daily necessities, logistics and other industries, and provide one or more solutions. In addition, also provides integrated solutions, through the combination of dynamic checkweighers and other product inspection technologies (such as: metal detection, X-ray inspection and visual inspection), so as to meet the more comprehensive needs of customers and provide more complete solutions .

### Total solution

Comprehensive solution of dynamic checkweigher and metal detector system  
Comprehensive solutions for dynamic checkweighers and packaging machines  
Comprehensive solutions for dynamic checkweighers and labelling machines (jet printers)  
Supported by distributors and ancillary suppliers around the world

### Diverse product options

Up to 20 standard dynamic checkweighers and additional optional devices  
Provide a variety of ranges and materials (eg: carbon steel spray, aluminum alloy, stainless steel) to meet different needs and environments  
Provides a variety of data communication standards  
(Example: Ethernet, RS485 and RS232 technology), which can realize seamless connection with data network suppliers around the world  
Remote maintenance technology, support remote maintenance and remote upgrade  
Support Industrial cloud and IOT integration mechanism

**Feature:**

Suitable for fresh sorting,4, 6, 8, 10, 12 level sorting can be customized

High-speed and high-precision dynamic sorting scale, accurately weighs fresh food and sorts it

Complete Sorter

It can be matched with a large-scale fresh food sorting and storage integrated system

Offers a variety of configurations of weighing technology, form factor and interface configuration for seamless integration.

Weighing range: 100 g - 5 kg

Accuracy:  $\pm 0.5$  g ~ 5 g

Working efficiency:  $\leq 120$  pieces/min

Touch screen size: 10 inches

**Production Size:**
