

High Temperature Wireless Crane Scale OCS-SZ-HBC

Specification:

Specially modified for smelt or metal processing factories, HBC series crane scale can operate under high ambient temperature:

Unique load cell for thermal scale.

Special equipped heat isolation plate for thermal radiation: Isolation plate dimension:

ExE = 573 x 573 mm² for 1~5 ton scale with plate weight of 18kg. ExE=623x623mm² for 10~50ton scale with plate weight of 20kg. Additional heat isolation layer inside the scale cavity to stop heat diffusion. Refer BC series for other parameters.

NOTE:

For operation under high temperature environment, the distance between hook and heated has to be greater than 1600mm and the temperature of heated load should not exceed 1800°C.
